

Chatham Main Line

Rochester / Strood to Faversham

inc Medway Valley & Sheerness Lines

The Chatham Main Line is a busy railway stretching from Central London and the West End in the North through the London commuter towns of Medway, Sittingbourne, Faversham, Whitstable, Herne Bay, Ramsgate, Canterbury and many more. It is a vital link for the South East coast, providing much faster and more direct services than the competing South Eastern Main Line, and links many more communities than HS1 could ever dream of. Despite the importance, much of the mainline, including within London, is just double track, leaving only small sections of quadruple track railway for faster services to overtake. Can you accurately signal and route trains to make sure everyone reaches their destinations on time? If you can, you can safely claim you are better than both Southeastern and Thameslink combined.

Off Peak Services

1tph St Pancras to Ramsgate via Faversham
2tph Luton to Rainham via Greenwich
1tph Victoria to Ramsgate via Faversham
1tph Victoria to Dover Priory via Faversham
1tph Victoria to Gillingham
2tph Sittingbourne to Sheerness-on-Sea
2tph Strood to Tonbridge

Additional Peak Services

1tph Ramsgate to Cannon Street
1tph Broadstairs to Cannon Street
1tph St Pancras to Faversham
1tph Gillingham to Cannon Street via Gravesend

Includes

Chatham Main Line from Rochester Bridge Junction to Faversham Junction
North Kent Line from Higham Tunnel to Strood for HS1 and Thameslinks services
Sheerness Line from Sittingbourne / Newington to Sheerness-on-Sea
Medway Valley Line from Strood to Paddock Wood, with services running onwards to Tonbridge
Off Peak and Peak Hour Timetables totalling 12 hours of signalling
Faithfully re-created track, switch and signalling layouts using real world data

Disclaimer

While based off real life, some track or signals have been altered for gameplay reasons. This includes the shrinking of some depots and sidings.

The timetable is based off real life service patterns and timings pre-covid, however it has not been made to replicate any exact timetable used by Southeastern or Thameslink.
